Public Private Partnerships

Construction Procurement Guidelines

Overview

Public private partnerships (PPP) is a term that can refer to many different kinds of relationships between the government and the private sector. Generally, the term is used to refer to long-term contracts for the delivery of a service, where the provision of the service requires the construction of a facility or asset, or the enhancement of an existing facility.

The private sector partner finances and builds the facility, operates it to provide the service and usually transfers control of it to the public sector at the end of the contract. A key objective of the PPP approach is the drive to optimise whole-of-life outcomes by encouraging innovation from the private sector.

For more information, see New Zealand Public Private Partnership (PPP) Programme.
